FULL-SERVICE / FAST TURNAROUNDS / LARGE CAPACITIES

Houston Powder Coaters (HPC) is a full-service powder coating facility offering high quality metal finishes, expert industry knowledge, and the fastest turnarounds in Houston. Located on the north side of Houston (near the intersection of Beltway 8 and the Hardy Toll Road), HPC provides a wide range of protective coating services to the industrial, architectural, and commercial markets with capabilities to satisfy complex project requirements.

With oven capacity stretching over 45 linear feet, HPC is proud to be Houston's leader in fusion-bonded epoxy (FBE) coatings. By developing close partnerships with customers, HPC tailors the ideal coating solutions to meet each project's specific need. Precision masking, media / abrasive blasting, custom packaging, as well as pick-up and delivery are only a few examples of the service extensions Houston Powder Coaters provides.

Whatever the millage, masking, and project management concerns, Houston Powder Coaters' knowledgeable team will tackle industry coating specifications and conformance reports. HPC is pleased to have worked with every industry in Houston and along the Gulf Coast.
